

ELECTRA

Providing solutions to
sub-station security

EXPAMET FENCING SYSTEMS

Don't get your wires crossed

ELECTRA

General Information

ELECTRA has been designed for the electric industry, particularly sub-station protection, where security and aesthetics all have to be taken into account. ELECTRA combines strength through expanded metal mesh with optional powder coated finishes which help your fence blend into the background. Expamet's new design incorporates low cost plastic gravel board options, new designed corners and a reduction in fixings, all of which make ELECTRA fast to install and a highly cost effective security fence.

High security protection of sub stations

Secure metal posts for easy installation

ELECTRA, as used in the electric industry
